

XSORB Outdoor Oil Stain Removal Test

Purpose: To evaluate the ability of XSORB All-Purpose Indoor-Outdoor Absorbent to remove dried oil stains from porous, untreated asphalt.

Hypothesis: XSORB will be able to partially remove the oil stain.

Test Method: The stain will be saturated with liquid solvent. XSORB will be applied to the stain and scrubbed into the surface with a stiff-bristled brush.

Before

↑ Untreated Oil Stain
used as marker

Oil Stain on porous, untreated concrete

After

Result: The oil stain was absorbed using 1 oz. XSORB Indoor-Outdoor. A faint shadow was still visible after one application.

Conclusion: XSORB was able to remove all of the surface oil and diminished the stain by 80%.
